PROJECTS

Blog Post | *Next.js, Supabase, Zod, Stripe, Authentication* | **Live Project**

- Enabled users to share blogs publicly with unique URLs, resulting in an average of 20+ unique link shares monthly
- Integrated secure authentication, achieving 95% reliability in user logins and access management
- Leveraged Next.js, TypeScript, Prisma, and local storage for fast and reliable performance
- Achieved zero data loss incidents with robust storage mechanisms using Prisma ORM
- Ensured blog data is consistently stored and accessible, enhancing user reliability

Admin Dashboard | *React.js, Syncfusion, Context API* | **Live Project**

- Developed a fully responsive Admin Dashboard using React.js and Syncfusion Library.
- Utilized React's Context API for effective state management and React Hooks for dynamic, reusable components.
- Implemented Syncfusion's rich UI components to enhance the overall user experience.
- Ensured cross-browser compatibility and mobile responsiveness for a seamless user experience across devices.

Supernal.aero Clone | *HTML, CSS, JavaScript, GSAP* | **Live Project**

- Developed a high-fidelity clone of the Supernal.aero website using HTML, CSS, and JavaScript.
- Utilized GSAP to create smooth and engaging animations.
- Ensured a fully responsive design for optimal performance across various devices.
- Delivered the project to a freelancing client on Upwork, meeting all specified requirements.

TECHNICAL SKILLS

Frontend: Tailwind, JavaScript, ReactJS, NextJS13, Tailwind, GSAP
Backend: Node.js, Express.js, TypeScript
Database: mySQL, MongoDB, PostgreSQL
DevOps: Docker, AWS, Serverless
